## PROJECTS

### GitFinder

- I built a web application where you can search for a GitHub user using their GitHub username.
- It displays a summary of the information associated with the GitHub account you searched for.
- I used HTML, CSS, JavaScript, and the Rest API.
- <https://gitfound.netlify.app>

### Global Weather

- I built a weather application that provides real-time weather information for every town or city worldwide.
- One of its distinguishing features is its depiction of the predicted time for sunrise and sunset.
- I used HTML, CSS, JavaScript, and the Rest API.
